PROFILE

Passionate software engineer and a big fan of clean code. A lot of experience in PHP and the Symfony Framework. I love building good maintainable software as well as thinking about software design or defining requirements.

After some years working for agencies I am now looking for a job opportunity at a company having a product themselves. I believe that this is the best place to care for software and build sustainable long living code.

EMPLOYMENT HISTORY

Auszubildender Fachinformatiker Anwendungsentwicklung, hmmh AG   Bremen, Germany
Aug 2017 — Jan 2020

Apprenticeship to become a software developer certified by the German IHK. The "Ausbildung" combines school with theoretical knowledge and practical experience. Hmmh AG is a e-commerce agency offering highly customized e-commerce concepts to its customers. My unit developed online shops based on Shopware 5. My main topics in this time were:

- Shopware 5
- Symfony 4
- Scrum
- Computer science (as a school subject)
- Business management (as a school subject)
- Co-Founder of the PHP user group Bremen

I shortened my Ausbildung by a half year.

Software Engineer, SensioLabs Germany / QOSSMIC   Hamburg, Germany
Feb 2020 — Sep 2021

After my Ausbildung was finished I accepted an offer from SensioLabs Germany (SensioLabs is the creator of the Symfony framework). At SensioLabs we offered consulting, software engineering and Symfony trainings to different clients. In February SensioLabs was renamed to QOSSMIC. In this time I was able to see many different projects in different sizes and architectures. In this time i was able to do a lot of pair programming with extremly experienced colleagues and learned a lot. My main topics in this time were:

- Symfony Certification
- Understanding existing code bases especially legacy code
- Migrations to Symfony or to later versions of Symfony
- Clean code
- Later also training and mentoring other developers

Senior Software Engineer, hmmh AG   Bremen, Germany
Oct 2021 — Present

Due to contacts which i kept from my Ausbildung I changed back to hmmh AG. With the experiences i collected while i was away i was able to take on a senior and

team lead role. Also i introduced many changes in the tech stack of our unit. My main topics in this time were:

- Building a project template as a basis for all new projects
- Introducing composer
- Introdocuing Phpstan, PhpCsFixer, Unit tests and E2E tests
- Introducing a Jenkins pipeline that includes all the code quality tools we need and that builds artifacts for deploying more stable applications
- Mentoring other apprentices in their Ausbildung
- Mentoring other colleagues about topics I introduced
- Being team lead for Shopware 6 Projects

EDUCATION

Abitur, Altes Gymnasium Bremen   Bremen, Germany
Mar 2017

- Graduated German Gymnasium

Bachelor of Engineering, AKAD Univerity   Remote
Nov 2022 — Present

- Parallel to work
- Still in progress
